

BADRU OLUMIDE DAVID

Software Developer

badrudavid2014@gmail.com | Portfolio | GitHub | LinkedIn

PROFILE

Software developer building React applications and extending Node.js backends. Projects include GradeVault, a school management system, and OVTech Academy, a live learning platform. Also writes prompts and reviews task content for AI training projects.

TECHNICAL SKILLS

Frontend: JavaScript, React, HTML, CSS, Material UI, Bootstrap, responsive design

Backend and data: Node.js, Express, MongoDB, Firebase, Firestore, REST APIs

Tools: Git, GitHub, Vite, Netlify, Render, Cloudinary, Figma

PROFESSIONAL EXPERIENCE

Data Annotator

Aug 2026 - Present

Mercor

- Write prompts and task content for AI training projects.
- Review and revise task content in line with project instructions.

Frontend Engineer / Technical Instructor

2023 - Present

One Voice Tech (OVTech)

- Build and maintain React and Firebase applications, including OVTech Academy.
- Manage deployments, domains and configuration on Netlify; troubleshoot production issues.
- Teach HTML, CSS, JavaScript, React and Git through practical projects and original course materials.

Frontend Engineer

Jan 2024 - Jun 2025

Gataama Group | gataama.com

- Built reusable React components and connected APIs for stories, dialogue and community content.
- Improved rendering and image loading; collaborated remotely on fixes and releases.

Operations and Digital Systems Manager

2018 - 2024

World Missions Agency

- Digitised workflows and reporting using Google Workspace and Excel, and trained staff on digital tools.

SELECTED PROJECTS

GradeVault

2025 - Present

School management system in development

React, Node.js, Express, MongoDB, Material UI

- Built the complete frontend with input from a product designer and an initial backend contributor; later took over backend development.
- Developed interfaces for student records, class and teacher assignments, attendance, academic terms and printable results.
- Maintain and extend the Express and MongoDB backend supporting role-based access, academic records and archived term results.
- Built timed assessment interfaces and submission workflows, supported by server-side multiple-choice marking and score recording.
- Implemented timetable interfaces for scheduling teacher workloads, checking conflicts and publishing class schedules.

OVTech Academy

React, Firebase, Firestore, Netlify | ovtechacademy.com

- Built scholarship application and review workflows, enrolment administration and student learning dashboards.
- Implemented lesson progress tracking and scheduled content release for self-paced and instructor-led courses.
- Added live-session administration and attendance recording, along with student certificate profile review and approval.
- Implemented certificate generation, public verification and revocation workflows, plus an optional alumni directory.

Honest Scholars Website

React, Netlify | honestscholars.org

- Built a responsive website for an education nonprofit, with reusable navigation, mobile layouts and custom-domain deployment.

EDUCATION

B.Tech (Hons), Management and Accounting

2009 - 2015

Ladoke Akintola University of Technology

SELECTED CERTIFICATIONS

Meta: Advanced React; Programming with JavaScript; Version Control; Introduction to Back-End Development.

IBM: Developing Front-End Apps with React; Generative AI - Introduction and Applications.
